Some Apps for Learning Times Tables and Other Basic Facts
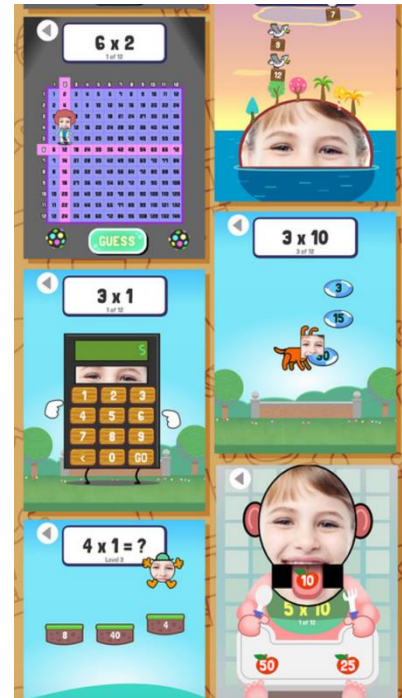

1. Crazy Times Table

Offered by: Madebyeducators (free, with option for upgrades)
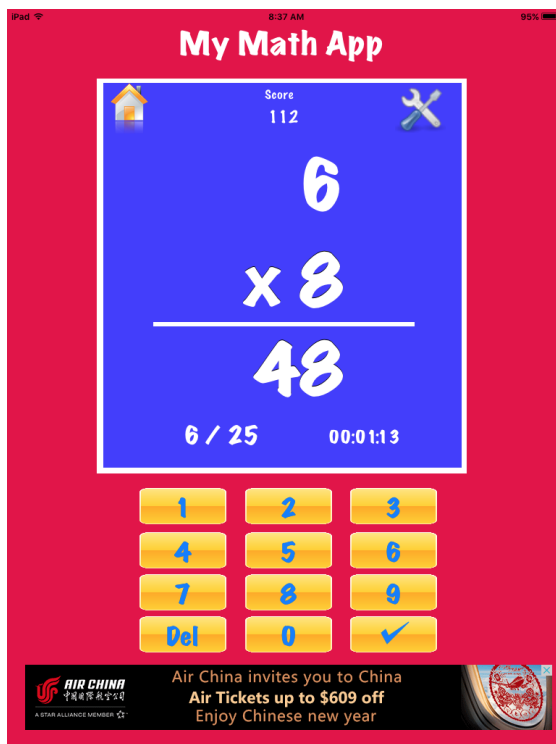

Description. It's easy to see this app is designed "by educators for kids," integrating a photo of the learner into graphics. For example, in one game kids feed themselves a hamburger with the correct answer, while in another they fly through space to select the appropriate number.

2. My Math Flash Cards App

**Offered by. Pankaj Humad** (free)

Description. As the name infers, this is the simplest and most flashcard-like of the apps Luke tried. The upside is that it's easy to use and the timer and keypad make it feel more game-like.

3. Keep on Jumping

Offered by. Hikari Nakashima (free)

Description. Learners complete problems as they climb towering cliffs with the goal of reaching the top.

4. Math Blaster

Offered by. Knowledge Adventure (free, with upgrade options)

Description. Learners race through levels shooting and dodging fast-flying obstacles to reach and defeat the Alien Boss. They use math skills to battle and unlock new tools as they go.

5.Thinking Blocks

Offered by. Math Playground (free, with upgrade options)

Description. This app teaches children how to model and solve word problems involving multiplication and division. The problem-solving models help learners organize information and visualize number relationships.
